

EUROSAT®

High Quality Solid 1.2m & 1.5m Dishes From

SC150 1.5m Dish

Az-EL Mount

A rugged commercial grade 1.2m & 1.5m heavy-duty antenna system offering affordable effective solutions for today's needs. The reflector is a one piece metal pressing having an intergrated curled rim shape to significantly increase the rigidity of the system. A large quality pressed support ring interfaces between the mount and the reflector. The design of the component allows for a highly stable system. The Az-EL mount is constructed from heavy-duty steel providing a rigid mount system.

In addition to the Az-EL mount the system is also available with a polar mount allowing easy installation for motorised multiple satellite reception applications.

Trade Prices:

SC120 Including Az-EL cap	£POA	SC150 Including Az-EL cap	£POA
SC120 Including polar mount	£POA	SC150 Including polar mount	£POA

Trade Only. Price exclude VAT @ 17.5%. Excludes carriage where applicable. E & OE
